DATA301 Individual Report

Genre and Positive Review Share on Steam, After Accounting for Price and Age Rating

Rakei Kahukoti: 300626332

Due: 25 October 2026

Content Overview

Section	Page
Executive Summary	2
1. **Background**	3
2. **Data Description**	4
a. Data Types and Structure	4
b. Variables Used in the Analysis	4
c. Data Cleaning and Completeness	4
3. **Ethics, Privacy and Security**	5
4. **Exploratory Data Analysis**	6
a. Scoping Data	6
b. Genre Distribution	6
c. Positive Reviews Distribution	6
d. Confounders (Price and Age by Genre)	6
5. **Detailed Analysis**	8
a. Method	8
b. Hypothesis test	8
c. Size of Each Effect	8
d. Model Fit and Prediction	8
e. Possible Biases	8
6. **Conclusions and Recommendations**	9
7. **References**	10
9. **Appendix B (Github Repository)**	11

Executive Summary

1. Background

Aim. This report answers one question. What is the relationship between a game's genre and its proportion of positive reviews, after accounting for price and age rating?

2. Data Description

2a. Data Types and Structure

2b. Variables Used in the Analysis

2c. Data Cleaning and Completeness

3. Ethics, Privacy and Security

4. Exploratory Data Analysis

4a. Scoping Data

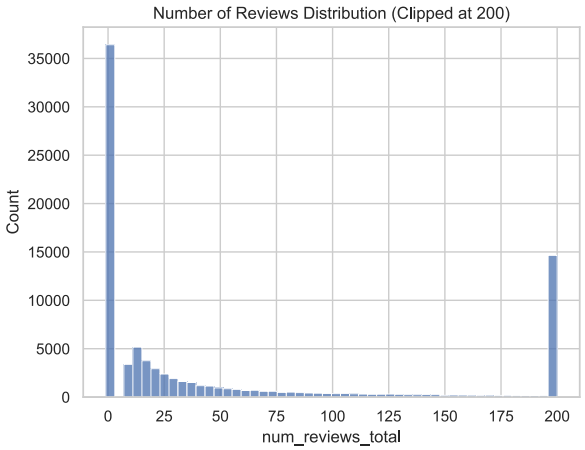

Figure 1: Distribution of total review counts, clipped at 200 reviews for readability

4b. Genre Distribution

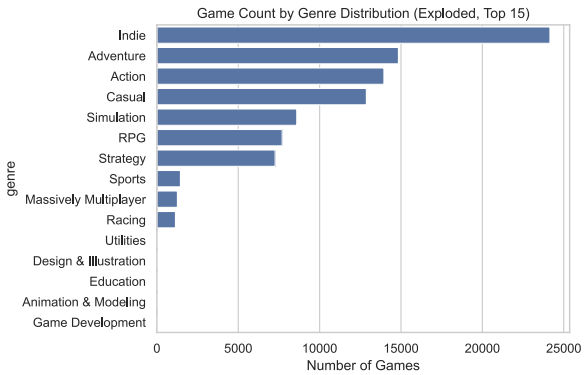

Figure 2: Number of games per genre, 10 genres with at least 100 games

4c. Positive Reviews Distribution

4d. Confounders (Price and Age by Genre)

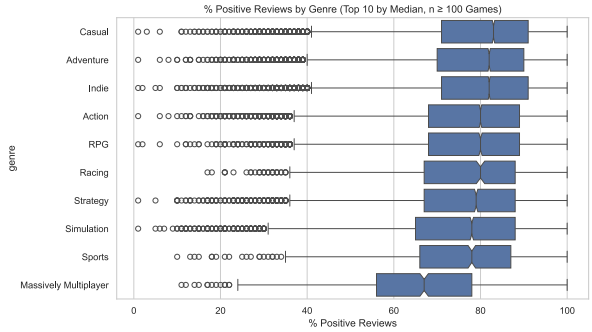

Figure 3: Percentage of positive reviews by genre, 10 genres with at least 100 games. Notches show approximate 95% confidence intervals for the median

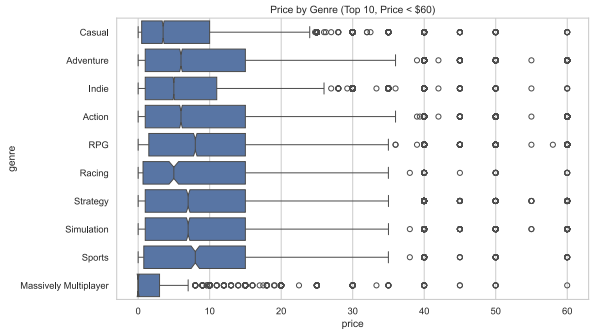

Figure 4: Base price (USD) by genre, games priced under $60. Notches show approximate 95% confidence intervals for the median

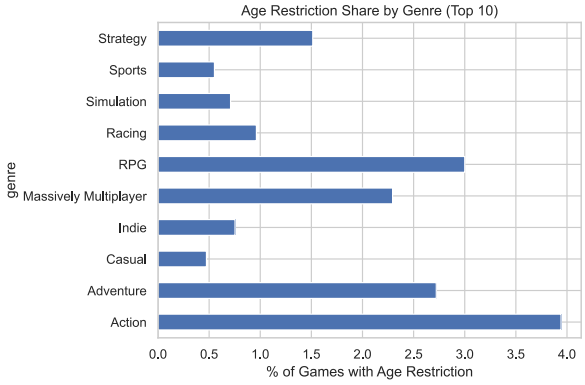

Figure 5: Share of games with an age restriction, by genre

5. Detailed Analysis

5a. Method

5b. Hypothesis test

5c. Size of Each Effect

5d. Model Fit and Prediction

5e. Possible Biases

6. Conclusions and Recommendations
